

Critical Care Transport Teams (CCTT) Mailing List

Out-of-hospital medicine, whether pre-hospital or inter-facility has been practiced for some time now.

Pre-hospital care both air and ground has been covered well. Currently, Critical Care Transport Teams (CCTT), have no forum to share thought and ideas. The CCTT field, in my opinion is very specialized and in need of an arena to toss around concerns and practices, so here it is. The CCTT listserver is here dedicated to those who are active in this field and may have knowledge to share with others. It is also a great place to bring up protocol issues.

Questions about the list should be addressed to Charles Flinn, NREMT-P at: cctt-owner@salieri.informatics.sunysb.edu
