

Competency Based Orientation and Continuing Education for Critical Care Transport Manual

A competency based orientation (CBO) program centers on the specific skills, behaviors, and knowledge that can be demonstrated by the learner to show proficiency or competency in designated areas. This detailed CBO manual provides a way to document crewmember skill acquisitions and competencies. The forms are designed so that they can be removed from the manual and utilized or they can serve as a guide for the development of your orientation and continuing education programs. Competency based check list and performance criteria, clinical skills objective criteria forms, and evaluation forms are ready for use. Included are recommendations for orientation and continuing education lectures with objective content for each lecture topic, resources for developing continuing education, internet resources, PDA resources, and much more.
